March 13

Dear Jan

Your letter with manuscript came today. I had already sent copy to the printer for April as I wasn't sure whether you were going to send me something in time. But I will have him run yours in place of something else.

As to the illustrations, I take it you will hold<sup>off</sup> on them till next installment. That's o.k. You don't have to send me the originals of the cards; but for making decent half-tones of the view sides you should have Boutrelle make good photos for me, while xeroxes maybe o.k. for the address side. In case ~~you~~ you sent me the cards do it by registered mail, and I send everything to printer registered. He has never lost anything on me yet.

Glad you like my Oceania exhibit. I overlooked the Van Loon~~er~~ origin, thanks for calling my attention to it. I have a lot of interesting essay and proof material which didn't fit into the exhibit

See you at Interpex.

Yours

*Bob*
